

Compact in size – big in performance

CitySpider

Small, but versatile

Not only does the CitySpider work effectively picking up consumer litter, such as plastic bottles, packaging, cans and cigarette butts, but it also makes short work of leaves and coarse debris.

Brushes

The two rotating front brushes have a variable sweeping width and floating suspension, protecting them from collision damage. Water spray jets on the brushes provide dust control in sensitive working areas. The brush speed is infinitely variable, allowing easy adjustment to suit the working conditions.

Suction nozzle

The suction nozzle is flexibly suspended between the wheels, preventing impact damage and ensuring constant ground clearance. Two water spray jets located in the suction nozzle keep dust and fine debris under control at all times.

Compact, operator friendly and powerful

Despite its compact frame, the CitySpider offers the driver a uniquely ergonomic and operator friendly working environment. Modern and attractive in design, this sub-compact sweeper boasts an exceptionally large cab interior and superb suction power.

The CitySpider has been designed to operate in town and city centres, through pedestrian precincts, at bus stops or in recreation areas. And it is ideal to help private contractors work professionally when cleaning show grounds, car parks or properties.

Huge capacity

The suction power and 850 litre hopper capacity are unprecedented for a sweeper in this class.

Hopper

The fully tilting stainless steel hopper allows debris to be easily dumped into skips or containers.

Wander hose

The wander hose can also reach areas where the sweeper cannot go.

Superior, innovative, all you need

The CitySpider incorporates years of experience in the development and manufacturing of compact sweepers for professional applications. It has been engineered throughout with the input of users to cater for every need, such as excellent visibility, simplest operation, safety and reliability.

With its small turning radius, the CitySpider is still easy to manoeuvre on narrow pavements and through tight alleys. Large wheels allow effortless kerb climbing. With its low vehicle height, access to multi-storey car parks no longer poses a problem either, and the adjustable brushes make even confined passageways a breeze to clean and negotiate.

Shredder fan

A heavy-duty shredder fan compacts the swept debris and conveys it into the hopper.

Cab

The soundproofed, low-vibration cab offers a working environment with unparalleled comfort for a machine in this class, providing excellent all-round visibility and a full view of the road, brushes and debris.

Easy operation

All controls and instruments are within easy reach and clear view of the driver.

Comfortable working environment

A comfort seat and adjustable steering column give the driver plenty of room to move and ensure an ideal driving position. The working environment is spaciouly designed for fatigue-free driving and operation.

Professional service Bucher Schörling's worldwide success is based on our distribution network offering qualified, customer-focused technical guidance wherever you are. For us at Bucher Schörling, service begins at the drawing board when we design vehicles to meet our customers' specific requirements and build bespoke solutions. We are renowned for our sound, competent advice and reliable service, provided by knowledgeable and well-trained professionals and by our efficient spare parts centres that assure the fastest delivery and long-term supply guarantees.

Certified quality – high cost-effectiveness Committed to quality, Bucher Schörling is dedicated to ensuring continuous machine uptime, long life and low maintenance. This ensures that our machines deliver the best value for money at the lowest total cost of ownership throughout their lives. Bucher Schörling's competence centres are naturally fully ISO 9001:2000 certified.
